WEBINAR
ODA CE Clinical

Diagnosis and Management of Orofacial Pain
Friday, September 18, 2015 | 12:00 – 1:00 PM EST

1 CE Point, Category 1 (Core)

Webinar Description
Dr. Tenenbaum will present several clinical cases that will be used to elucidate the complexity of orofacial pain. Emphasis will be placed on the understanding of the concept that not all orofacial pain conditions are temporomandibular disorders, which seems to be a common misperception. Information will also be presented that pertains to temporomandibular disorders, and the differentiation of these from dentoalveolar and neuropathic pain conditions.

Speaker
Dr. Tenenbaum received his DDS from the University of Toronto in 1978, and then completed his specialty in Periodontology as well as a PhD in bone cell biology by 1982. This was followed by a two year post-doctoral MRC fellowship in Bethesda at the National Institutes of Health. In addition to his degrees, he has a Fellowship from the Royal College of Dentists of Canada, as well as the International College of Dentists and the Academy of Dentistry International. Dr. Tenenbaum is a Professor of Periodontology, and was Head of that Discipline for eight years (1997-2005), at the Faculty of Dentistry, University of Toronto. He was also Associate Dean for Biological and Diagnostic Sciences for six years having stepped down September 2007 to pursue his research more actively. He is a cross-appointed Professor in the Department of Laboratory Medicine and Pathophysiology, Faculty of Medicine, University of Toronto and is the Head of the Division of Research in the Department of Dentistry at Mount Sinai Hospital. Dr. Tenenbaum is on active staff at the UHN, Princess Margaret Hospital Division, Department of Dentistry.

Learning Objectives
By the end of this session, participants will be able to:
- Recognize various orofacial pain conditions
- Recognize that given the difficulty in diagnosis of orofacial pain, a complete history should be taken to understand the patient’s pain condition as accurately as possible. Do not accept a previous diagnosis as the actual cause of a patient’s pain.

Webinar Details
Course Fee: $65.00 (includes HST)

CANCELLATION POLICY Cancellations received in writing up to seven business days prior to the event will be given a full refund. No refund or credit will be issued for cancellations received less than six business days prior to the event. The ODA reserves the right to cancel or reschedule an event as the result of unforeseen circumstances or insufficient advance registration. In the event of such a cancellation, we will provide a full refund but, regretfully, cannot accept responsibility for out-of-pocket costs incurred due to the cancellation.

Audience: This webinar is limited to ODA-member dentists only.

Type of Program: One-hour live online webinar with the opportunity to submit questions in real time during the Q&A period.

Registration Deadline: Register online by Thursday, September 17 (noon). Once you have registered, you will receive a confirmation email. Instructions about how to log onto and participate in the webinar will be emailed one week prior to the webinar.

Please note: to confirm registration, payment must be received prior to the event.

Payment Methods: Payments can be made online by credit card (VISA/MasterCard).
